Education

Pandit Deendayal Energy University

Bachelor of Technology in Information Communication and Technology — CGPA : 9.75

Sep'22 – May'26

Gandhinagar, Gujarat

Experience

Growexx AI Solutions

Junior Software Engineer

Jan'26 – July'26

Ahmedabad (On-Site)

- Completed **10+ weeks** of intensive training in **MERN Stack** technologies including **JavaScript, React, Node.js, Express.js, TypeScript, NestJS, Next.js, PostgreSQL, and SQL**.
- Gained hands-on experience with **5+ modern development tools and practices** including **Git/GitHub, Agile Methodology, SonarQube, AWS and Cursor AI**.
- Streamlined a **Jira work log synchronization** solution, automating timesheet data entry and improving workflow tracking accuracy for **50+ team members**.

Altum Labs LLP

Flutter Developer Intern

June'25 – July'25

Ahmedabad (On-Site)

- Gained end-to-end development experience by contributing to **2 production-ready mobile apps**, from feature implementation to deployment on **Android and iOS**.
- Conducted internal testing and **resolved 3 Play Store warnings** ensuring compliance and seamless updates.
- Configured **CI/CD pipelines** in **Azure DevOps** for **2 mobile apps**, automating build, test, and deployment workflows

Projects

ProctoCode — *Next.js, TypeScript, Express.js, MongoDB, Socket.IO* [\[Github\]](#) [\[Website\]](#)

Mar'26

- Built a full-stack **AI-powered proctored coding platform** with 2 role-based workflows (Admin and Candidate) using Next.js 15, Express, MongoDB, and **JWT authentication** with OTP password recovery.
- Engineered real-time **trust score tracking** via Socket.IO, monitoring 5 behavioral signals (tab switches, paste events, inactivity, fast typing, visibility changes) with live updates to admin dashboards.
- Developed a secure **server-side code sandbox** supporting 5 languages (JavaScript, Python, Java, C, C++) with dangerous-pattern blocking, 10s execution timeout, and automated **test case validation**.
- Integrated **Groq AI (Llama 3.3 70B)** for 4 automated features — code quality review, interview problem generation, behavioral risk analysis, and session-level candidate summaries.

Headlinr — *Flutter, GetX, REST API* [\[Github\]](#)

June'25

- Implemented curated news with **4 categories** and real-time updates from a public REST API.
- Eliminated nearly 80% of repeated UI** code by designing scalable reusable components.
- Optimized API response** with shimmer loaders, cutting article load time to under **800ms**.
- Built a **CI/CD pipeline** using **GitHub Actions** to automate deployment, reducing manual release efforts by 80%.

Weather App — *Kotlin, Jetpack Compose, REST API* [\[Github\]](#)

July'24

- Engineered a weather application delivering **real-time forecasts with 95% API uptime**, improving data reliability for end users.
- Optimized API integration** to reduce average **data fetch time** from almost **2.5s to 1.3s**.
- Implemented **weather-specific backgrounds** linked to API responses, improving visual feedback and **boosting user engagement by 30%**.

Technical Skills

Languages: Java, Kotlin, JavaScript, TypeScript, Dart, HTML/CSS, SQL

Frameworks: React, Next.js, Nest.js, Express, Node.js, Flutter, Jetpack Compose

Databases & Cloud: MongoDB, Firebase, AWS

Tools: Git, GitHub, Azure DevOps, Android Studio, REST APIs

Fundamentals: Data Structures & Algorithms, OOP, DBMS

Achievements

Certification – Android App Development with Kotlin

Mar'23

- Completed 40+ hours of Kotlin Android development covering app architecture, UI design, and API integration.
